# Camp Overview

- This summer youth football players from around the Kitsap and Olympic Peninsulas will have a unique opportunity to attend a local Skills and Drills Football Camp. The camp will be held at the Kingston High School football field for athletes K-8th grade for the 2017-2018 school year.
- Our coaching staff will group campers by age, position, ability and experience to allow coaches to progressively teach safety, basics, and advanced techniques to best benefit each group. We will also offer a BBQ and an autograph session Tuesday after camp concludes.

\*Water Breaks will be provided throughout each camp session.

\*This is a non-contact camp.

#### Questions?

Contact KHS Head Coach Alec Grimm Phone: (206)-909-2455 Email: alecgrimm54@gmail.com

#### **Coaching Staff:**

Nesby Glasgow is a former University of Washington Husky and proud member of the UW"All Century" team. Drafted by the Baltimore/Indianapolis Colts, Nesby went on to play 9 seasons before being traded to Seattle where he continued to play another 5 seasons before ending his illustrious 14-year NFL career

Randall "Too Tough To Handle"
Morris is a former Running back
drafted out of Tennessee by the Seattle
Seahawks in 1984. Randall played 5
seasons with the Seattle Seahawks
before heading to Detroitwhere he
finished his career playing for the
Lions.

# West Sound Youth Football Camp 2017

Kingston High School: July 10th-11th

• Our philosophy is to "let the campers have fun" while learning a lot of football! Players will learn more than just football at camp. They are taught about teamwork, consideration of others, self-discipline, and how to attain their potential in sports and in life. Players also learn the importance of achieving good grades and selecting appropriate role models. We will encourage them to go home a more positive, and optimistic person.

\*Please have all Registration and Emergency forms turned in prior to June 1st

#### Camp Schedule and Agenda

July 10th-11th, 2017
Check In: 8:30am
Skills and Drills Session:
9:00am-1:00pm

#### What to Bring

- Medications (if applicable)
- Cleats
- Shorts or Sweats
- •T-Shirt or Sweatshirt
- •Water Bottle (With name on it)

## North Kitsap School District Concussion Fact Sheet

for High School Sports
Fact sheet for **STUDENT-ATHLETES** 

#### What is a concussion?

A concussion is a brain injury that:

- Is caused by a bump, blow, or jolt to the head.
- Can change the way your brain normally works.
- Can range from mild to severe.
- Can occur during practices or games in any sport.
- Can happen even if you haven't been knocked out.
- Can be serious even if you've just been "dinged" or had your "bell rung."

#### How can I prevent a concussion?

It's different for every sport. But there are steps you can take to protect yourself from concussion.

- Follow your coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.
- Use the proper sports equipment, including personal protective equipment (such as helmets). In order for equipment to protect you, it must be:
  - Appropriate for the game, position, and activity
  - Well maintained
  - Properly fitted
  - Used every time you play

#### What are the symptoms of a concussion?

- Nausea (feeling that you might vomit)
- Balance problems or dizziness
- Double or fuzzy vision
- Sensitivity to light or noise
- Headache
- Feeling sluggish
- Feeling foggy or groggy
- Concentration or memory problems (forgetting game plays)
- Confusion

#### What should I do if I think I have a concussion?

- Tell your athletic trainer, coaches and your parents. Never ignore a bump, blow, or jolt to the head. Also, tell your coach if one of your teammates might have a concussion.
- Get a medical check up. A licensed health care professional can tell you if you have had a concussion and when you are OK to return to play.
- Give yourself time to recover. If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a second concussion. Second or later concussions can cause permanent brain damage, and even death in rare cases. Severe brain injury can change your whole life.

#### How do I know if I've had a concussion?

You can't see a concussion, but you might notice some of the symptoms right away. Other symptoms can show up days or weeks after the injury. It's best to see a health care professional if you think you might have a concussion. An undiagnosed concussion can affect your ability to do schoolwork and other everyday activities. It also raises your risk for additional, serious injury.

#### It's better to miss one game than the whole season.

# North Kitsap School District Concussion Fact Sheet

for High School Sports
Fact Sheet for **Parents** 

#### What is a concussion?

A concussion is a brain injury. Concussions are caused by a bump, blow, or jolt to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even a "ding" or a bump on the head can be serious.

#### What are the signs and symptoms of concussion?

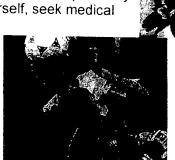

You can't see a concussion. Signs and symptoms of concussion can show up right after the injury or can take days or weeks to appear. If your teen reports any symptoms of concussion, or if you notice the symptoms yourself, seek medical attention right away.

Signs observed by athletic
b and by definetic
trainer, coaches, parents
or guardian
Apparation

- Appearing dazed or stunned
- Is confused about assignment
- Forgets plays
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness
- Shows behavior or personality changes
- Can't recall events prior to hit
- Can't recall events after hit

#### Symptom reported by athlete

- Headache
- Nausea
- Balance problems or dizziness
- Double or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish
- Feeling foggy or groggy
- Concentration or memory problems
- Confusion

# What should you do if you think your teenage athlete has a concussion?

- Seek medical attention right away. A health care professional will be able to decide how serious the concussion is and when it is safe for your teen to return to sports.
- Keep your teen out of play. Concussions take time to heal. Don't let your teen return to play until a health
  care professional says it's OK. Athletes who return to play too soon—while the brain is still healing—risk a
  greater chance of having a second concussion. Second or later concussions can be very serious. They
  can cause permanent brain damage, affecting your teen for a lifetime.
- Tell your teen's athletic trainer and coaches about any recent concussion. Athletic Trainers and coaches should know if your teen had a recent concussion in ANY sport. Your teen's athletic trainer and coaches may not know about a concussion your teen received in another sport or activity unless you tell them. Knowing about the concussion will allow the athletic trainer and coach to keep your teen from activities that could result in another concussion.
- Remind your teen: It's better to miss one game than the whole season.

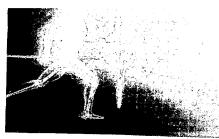

#### It's better to miss one game than the whole season.

What is sudden cardiac arrest? Sudden Cardiac Arrest (SCA) is the sudden onset of an abnormal and lethal heart rhythm, causing the heart to stop beating and the individual to collapse. SCA is the leading cause of death in the U.S. afflicting over 300,000 individuals per year.

SCA is also the leading cause of sudden death in young athletes during sports

What causes sudden cardiac arrest? SCA in young athletes is usually caused by a structural or electrical disorder of the heart. Many of these conditions are inherited (genetic) and can develop as an adolescent or young adult. SCA is more likely during exercise or physical activity, placing student-athletes with undiagnosed heart conditions at greater risk. SCA also can occur from a direct blow to the chest by a firm projectile (baseball, softball, lacrosse ball, or hockey puck) or by chest contact from another player (called "commotio cordis").

While a heart condition may have no warning signs, some young athletes may have symptoms but neglect to tell an adult. If any of the following symptoms are present, a cardiac evaluation by a physician is recommended:

- · Passing out during exercise
- Chest pain with exercise
- Excessive shortness of breath with exercise
- Palpitations (heart racing for no reason)
- Unexplained seizures
- · A family member with early onset heart disease or sudden death from a heart condition before the age of 40

How to prevent and treat sudden cardiac arrest? Some heart conditions at risk for SCA can be detected by a thorough heart screening evaluation. However, all schools and teams should be prepared to respond to a cardiac emergency. Young athletes who suffer SCA are collapsed and unresponsive and may appear to have brief seizure-like activity or abnormal breathing (gasping). SCA can be effectively treated by immediate recognition, prompt CPR, and quick access to a defibrillator (AED). AEDs are safe, portable devices that read and analyze the heart rhythm and provide an electric shock (if necessary) to restore a normal heart rhythm.

Remember, to save a life: recognize SCA, call 9-1-1, begin CPR, and use an AED as soon as possible!

Cardiac 3-Minute Drill

#### 1. RECOGNIZE

#### Sudden Cardiac Arrest

- Collapsed and unresponsive
- Abnormal breathing
- Seizure-like activity
- 2. CALL 9-1-1
- · Call for help and for an AED
- 3. CPR
- Begin chest compressions
- Push hard/ push fast (100 per minute)
- 4. AED
- Use AED as soon as possible
- 5. CONTINUE CARE
- Continue CPR and AED until EMS arrives

Be Prepared! Every Second Counts!
